

## Welcome all to the year 2013

Nadia Magnenat-Thalmann

Published online: 6 December 2012  
© Springer-Verlag Berlin Heidelberg 2012

I would like to welcome all of you to the year 2013 and thank you for contributing to make the Visual Computer journal a success story.

Thanks to our authors: we have received last year 176 original research submissions. Out of these 176 submissions, 28 papers have been selected for publication. I take this opportunity to thank all authors for their interest and contributions to the Visual Computer.

This year, Professor Rick Parent and Professor Nicholas M. Patrikalakis left The Visual Computer Editorial Board. I would like to thank both of them for their great support over these years and their dedication to the journal. I really appreciated their constant commitment and hard work for the journal.

Thanks to the 386 reviewers last year who have reviewed the submitted papers, we were able to select the best of all submitted papers for the journal. I am very thankful to the associate editors of the Visual Computer and all the reviewers who have spent their precious time to review the submitted papers.

For the coming year, we schedule regular issues and a few special issues. One of our special issues will contain all selected papers from the Computer Graphics International Conference (CGI'2013), which will be held in Hanover, Germany.

The publication of The Visual Computer would not be possible without the hard work of Ronila Gamatero, and the new assistant editor Sneha Rahul. I also like to thank all the Springer people who do a tremendous work to make the is-

suues appear on time, particularly Rachel Roberts, Beate Uhl and Beverley Ford.

I wish you a very successful academic life and also a happy 2013 new year.

### Reviewers list

Fakhr-Eddine Ababsa, Institut Universitaire de Technologie d'Évry, France

Neeharika Adabala, CybULab, Bangalore, India

Ceyhun Akgul, Vistek-ISRA Vision, Turkey

Brian Allen, Nanyang Technological University, Singapore

Gholamreza Anbarjafari, Cyprus International University, Turkey

Orniana Ancuti, Hasselt University, Belgium

Andre Anjos, Idiap Research Institute, Switzerland

Lyndsey Ann Clarke, Swansea University, United Kingdom

Michel Antunes, University of Coimbra, Portugal

Boris Aronov, Polytechnic Institute of NYU, USA

Indriyati Atmosukarto, University of Washington, USA

Phillip Azariadis, University of the Aegean, Greece

Hernan Badino, Carnegie Mellon University, USA

Xue Bai, Adobe Systems, USA

Feng Bailan, Institute of Computing Technology, Chinese Academy of Sciences, China

Vineeth Balasubramanian, Arizona State University, USA

Francesco Banterle, Visual Computing Lab ISTI-CNR, Italy

Bingkun Bao, National University of Singapore, Singapore

Jean-Charles Bazin, ETH Zurich, Switzerland

Dominique Bechmann, Université de Strasbourg, France

Alexander Belyaev, Heriot-Watt University, United Kingdom

Boaz Ben-Moshe, Ben-Gurion University of the Negev, Israel
